EDUCATION

Nanyang Technological University, B.S Computer Science, CGPA: 4.64 **May 2021 — 2025**
Exchange Semester at Northeastern University for Computer Science *Dec 2023*

EXPERIENCE

Software Engineer - OKX (Core Trading Team) **June 2025 — Present**

- Delivered the UAE Retail Derivatives launch and CeDeFi Boost, achieving a **6x conversion rate increase (2% → 12%)** for high-tier users and growing the trading user base by **20%** through optimized migration flows.
- Implemented a self-initiated integration testing framework that reduced deployment testing time by **90% (20 min → 2 min)**; authored AI-assisted tests and rules, significantly increasing quality
- Diagnosed and fixed deep-layer distributed system bugs (NPE, PolarDB, Flink, Cross-repo caching) that blocked major features like Limit Orders, preventing significant reputation damage and unblocking complex API releases.
- Owned the end-to-end V5→V6 API migration across 3 teams; engineered **Portfolio Analytics APIs (Unrealized P&L)** within a strict 1-week deadline, navigating complex compliance filters and preventing financial reporting errors by identifying a critical query logic bug.

Software Data Engineer Intern - Advanced Micro Devices (AMD) **Jan 2024 — Aug 2024**

- Constructed an ETL pipeline to optimize **batch streaming data processing**; saved executives **90% of data review time** enabling instant data-driven decision making.
- Enhanced **scalable data quality frameworks**, directly improving data cleaning processes and model accuracy for predictive analytics; boosted forecasting model speed by **10x**.

Software AI Engineer Intern - Central Provident Fund (CPF) **May 2023 — Aug 2023**

- Integrated a ChatGPT variant into a chatbot using open-source LLMs (LLaMA); enhanced user interaction and **reduced manual document search time by 2.3x**.
- Collaborated on multiple cross-functional AI projects, resulting in substantial **man-hour savings of 83% (from 60 to 5 minutes per day)**.

FullStack Engineer Intern - Promisphere Official (Backed by DBS) **May 2022 — Aug 2022**

- Built full cloud infrastructure/CI/CD, **reducing deployment time by 77%**; executed TDD with **50+ tests** to ensure system stability.
- Initiated the development of a soulbound dApp (ERC-721) within a **2-week timeframe**

PROJECTS

Don't Paiseh | *FastAPI, OpenAI, NextJS* **Jan 2024**

- Led frontend for a mobile-first social Q&A WebApp; deployed full end-to-end MVP in **24 hours**.

Rizz-Umé | *Telegram, OpenAI, Node.js* **Feb 2023**

- Led team of 4 to deploy an AI career consultant bot MVP in **48 hours** with database integration.

Smart Contract Developer | *IPFS, Solidity, Infura* **Dec 2023**

- Developed decentralized history collaboration platform with smart contracts for transparency

LEADERSHIP

Nanyang Technological University

- Chief Group Leader:** Led 90 students through 3-day Orientation camp; coordinated stakeholders.
- Director of Publicity, Blockchain@NTU:** Organized events with Coinbase, managed socials.

SKILLS

Languages & Tools: Java, Python, Springboot, SQL, Typescript, Solidity, Kafka, Spark, TensorFlow, Docker
